STICK CHECK

RISK MANAGEMENT SOLUTION

Safely manage hockey sticks in your arena!

Stick Check™ is a Risk Management solution for safely managing hockey sticks in the arena.

Stick Check was designed to organize hockey sticks in hallways or dressing rooms at arenas. Stick Check provides a safe effective storage solution keeping sticks organized and clear of hallways, and fire routes, eliminating trip hazards.

The Problem: sticks leaned against the wall. When one person takes a stick out of this group, the domino effect causes all of the sticks to fall, creating a clear safety hazard.

The Solution: Stick Check a rack system that allows for easy placement of the stick but prevents them from falling over and ensures a safe environment. The sticks can be aligned at any given angle to accommodate a narrow hallway and still be very cost effective.

- Stick Check is made in Canada and is designed to perform in extreme cold and heat conditions like those found in Canadian rinks
- Made of lightweight specialized extremely durable plastics
- Cost effective
- Easy to install
- Safety coloured for better visibility
- Modular design – replaceable units
- Easily expanded (add modules to handle more sticks)
- Home application for the garage or basement
- Designed specifically for the needs of Hockey arenas
- Warranty – 90 day limit warranty covering material and workmanship
- Unique design system that accommodates storage and organization of other tools or objects within the same environment.
